ASSESSMENT & ANALYSIS MATURITY & COMPLIANCE GAP REVIEW

KNOW YOUR GAPS, GROW YOUR RESILIENCE

Many organizations have policies, controls, and technologies in place but often they aren't fully embedded, consistent, or measured. Without knowing how mature your program really is or where the gaps are, compliance risks, inefficiencies, and blind spots continue to persist.

Arista Cyber assess where your OT cybersecurity program stands right now, including policies, procedures, technologies, awareness, controls, and compares it against leading frameworks such as IEC 62443, NIST SP 800-82, NIST CSF. We identify missing or weak areas, map maturity levels, and help you establish a roadmap to elevate your program from basic compliance to resilient, well-governed security practices. Throughout, we offer transparent communication with your OT, IT, and compliance teams so proposed improvements are feasible, relevant, and well understood.

KEY BENEFITS

- Detect missing controls or inconsistencies in policies, technologies, or procedures.
- Align your current state with industry or regulatory standards you aim to meet.
- Focus remediation where it delivers the most value and reduces risk.
- Protect operations by ensuring security improvements do not disrupt production.
- Build evidence and readiness for audits, certifications, or internal governance.
- Monitor and benchmark your maturity over time to support continuous improvement.

DELIVERABLES

- Detailed gap analysis report highlighting deviations from standards you care about.
- Maturity scorecard across OT cybersecurity domains (policies, technology, awareness, etc.).
- Prioritized list of missing or underperforming controls and procedures.
- Concrete recommendations to close gaps and strengthen your security posture.
- Full roadmap with clear timelines and accountability.
- Documentation to support regulatory compliance, audit readiness, and executive alignment.
